Twentieth Century Historic-Thematic Framework

A tool for assessing and protecting the heritage of the twentieth-century. Commissioned by the Getty Conservation Institute in collaboration with the ICOMOS International Scientific Committee on Twentieth-Century Heritage, the thematic framework identifies the principal social, technological, political, and economic drivers of change that shaped the twentieth century globally.

- Rapid Urbanization and the Growth of Large Cities
- Accelerated Scientific and Technological Development
- Mechanized and Industrialized Agriculture
- World Trade and Global Corporations
- Transportation Systems and Mass Communications
- Internationalization, New Nation States, and Human Rights
- Conserving the Natural Environment, Buildings, and Landscapes
- Popular Culture and Tourism
- Religious, Educational, and Cultural Institutions
- War and Its Aftermath
