

A walk down Science Road, University of Sydney, Camperdown Campus

'He dreams to make the University city a place of great beauty, and plans to do the work with living Australian and exotic trees ' (Interview with Professor E.B. Waterhouse, SMH 31/12/1930)

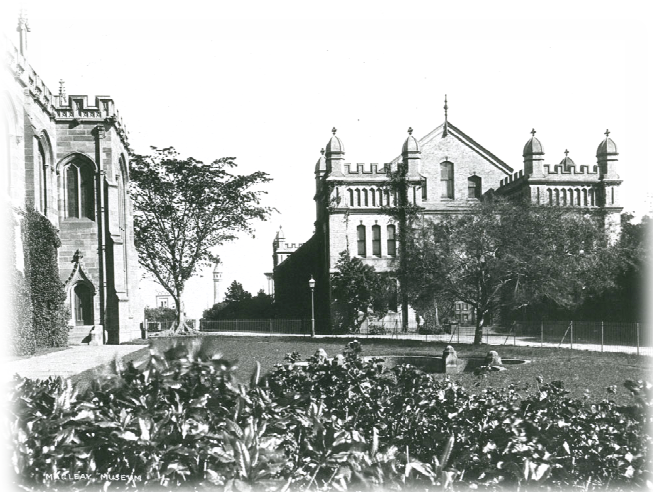

SUNDAY 27th July, 2pm – 4pm

Where: On site, University of Sydney (more details on booking)

SPEAKER: Christine Hay

Science Road is a significant heritage place. Acknowledged for its architecture, the story of its historic landscape development however is lesser known. Particularly the design hand of Professor E.G. Waterhouse, evident in the gardens, trees, lawns and courtyards associated with the aesthetics of today's Science Road streetscape, is still being recaptured.

Come and hear Christine (landscape architect, Masters of Heritage Conservation student, involved in the 2014 revised Grounds Conservation Management Plan for the Camperdown and Darlingtown Campuses) give an account of aspects of the site's history, main influential characters via its byways, and visual delights. Help us identify a few mystery plants – *Camellia japonica* cultivars and more – thinking caps on!

Botany Lawn (source: Macleay Museum)

Macleay Court *Camellia* (source: C.Hay)

COSTS: Members: \$20, Guests: \$30, includes light refreshments.

Bookings essential: Email David Low: david@low.name or phone 9943 1456.

PLEASE NOTE: Payment confirms booking. (NB: please do not call / email Jeanne Villani).
