

INDUSTRIAL HERITAGE CASE STUDIES

- What are the opportunities in our industrial heritage?
- How can reusing these fascinating places and spaces help to reinvigorate our cities, towns and landscapes?
- What roles might they play in twenty-first century Victoria?

The Heritage Council of Victoria and the Melbourne School of Design invite you to participate in an afternoon of discussion and debate around the adaptive reuse of our industrial heritage.

This event celebrates and launches the release of new case studies and an issues paper, which aim to inspire and challenge Victorians to make better use of the state's rich industrial heritage.

The afternoon is organised as two panel discussions, one looking at the new uses and users, the other at urban potential. Panellists include: Helen Lardner, Angus Farquhar, Eleni Arbus, Tim Greer, Mark Healy, and Emma Appleton, with others to be confirmed. The panel will be chaired by Justine Clark.

The event is generously hosted by the Faculty of Architecture, Building and Planning at the University of Melbourne, and is followed by a public lecture by Angus Farquhar, creative director of NVA, as part of the ABP Agenda series. www.nva.org.uk

When: 15 July, 2013

Symposium & launch: 3–6pm

(please arrive by 2.50 pm)

Public talk: 6.30–8 pm

Where: The Open Stage
level 1, 757 Swanston St
University of Melbourne
