LIVES OF THE GREAT GARDENERS

Throughout history great gardeners have risen from all walks of life.

Some have been aristocratic amateur gardeners, others professional designers with an international practice. Some have come to garden-making from sister arts such as sculpture or painting; others have been hands-on nurserymen or botanists. What they all have in common is the ability to take an idea and develop it in a new manner relevant to their times.

NATURE'S PALETTE : A COLOUR REFERENCE SYSTEM FROM THE NATURAL WORLD

The first-ever visual expansion of Werner's Nomenclature of Colours, featuring over 800 illustration references from the natural world. First published in 1814 and expanded in 1821, Werner's Nomenclature of Colours attempted to establish a universal colour reference system to help identify, classify and represent species from the natural world. In *Nature's Palette* this technicolour trove has, for the first time, been enhanced with the addition of illustrations of the animals, vegetables and minerals Werner referenced alongside each colour swatch and accompanied by expert text explaining the uses and development of colour standards in relation to zoology, botany, minerology and anatomy.
