

TIMBER DECAY & CONSERVATION

Woodlands Homestead

The Woodlands complex, with the earliest prefabricated section dating from 1842, is a rare remnant of the early period of land occupation and settlement in Victoria. Its location in a large public park of open woodland setting is a now rare representation of the landscape which distinguished much of the area at the time of first European settlement.

Victoria Heritage Register H1612

Friday 4 June 2010

Timber Decay and Conservation

Learn about timber decay and conservation in Heritage Buildings, at Heritage Victoria's 'Timber Decay and Conservation Master Class'.

The program, led by David Young OAM, will include:

- Wood anatomy: from heartwood comes durability
- Wood and water: a swell topic
- Fungal rot: decay by any other name
- Borers
- Dealing with termites
- Conservation and repair

The master class will fulfil the requirements for 6 formal points as part of the Building Commission Continuing Professional Development Program.
