

TRADITIONAL ROOFING REPAIR WORKSHOP at the Longford Academy

Brickendon Estate, Longford, Tasmania - Thursday 12 May 2016, 9.30am – 4.00pm

Roofers, carpenters, plumbers, conservation practitioners, property managers, specifiers and project managers are invited to attend a one-day practical workshop on APT-recommended systems of managing traditional roofs presented by specialist contractor, Greg Owen, of Period Building Conservation (Victoria) and the Longford Academy team.

Outline of Workshop

Maintenance, repair and management of [Metal](#), [Slate](#), [Terra Cotta](#) and [Timber Shingle](#) roofs, including:

- Evaluating condition of roofs and rainwater goods and identifying sources of deterioration.
- Identifying, documenting and installing roofing materials and rainwater goods.
- Understanding traditional and contemporary roofing systems and replacement options.
- Preservation and repair methods and strategies for deteriorated roofs.
- Evaluating effectiveness of roofing materials and rainwater goods, consequences of inadequacies and options for remediation.
- Rainwater goods – gutters, downpipes, rainwater heads, spouts, cappings and flashings.
- Impacts on significance on repairs and replacement – extent and selection of materials.
- Selection and application of coatings on timber and metal roofing components.
- Doing it – making, repairing, applying and installing.

Attendance \$150 (includes lunch).

To register, contact the APT Convenor by email: apt.australasia.chapter@gmail.com

Sponsored by TBCITB.

To be considered for funding assistance apply directly to the TBCIT Board at least three working days prior to commencement of the course. Approval must be obtained before the course commences.

TRADITIONAL ROOFING REPAIR WORKSHOP at the Longford Academy

Brickendon Estate, Longford, Tasmania - Thursday 12 May 2016, 9.30am – 4.00pm

The Longford Academy Traditional Roofing Repair Workshop is delivered at Brickendon Estate by Greg Owen with assistance from the Longford Academy team.

Venue: Sussex Barn at Brickendon Farm complex (enter from carpark off Woolmers Lane).

About Greg Owen

Greg's first career was as a Mechanical Maintenance Engineer responsible for buildings and their services and industrial services. Having looked after working heritage buildings for some time he changed career into conservation building. He and his wife started their firm about 25 years ago and Period Building Conservation still services rural Victoria, Southern NSW and remote Australia from their North East Victoria base at Stanley, near Beechworth in Victoria.

Greg has a strong interest in the science and technology of building conservation as well as the maintenance of a wide range of traditional trade skills. He practices trade skills, hands on, in roofing as well as other areas. He is a licensed Domestic & Commercial Builder and became a licensed plumber by mature age entry about 15 years ago. He is a member of the Heritage Council (Vic) Technical Advisory Committee and Heritage Victoria's Corrugated Iron Working Group.

Period Building Conservation has built it's own sheet metal workshop facilities and skills as a result of not being able to source traditional roofing materials, rainwater goods and trade skills to service it's wide range of projects.
